It has always been our focus to ensure our passion for design flows through every kitchen, bathroom, wardrobe or bespoke piece of furniture we create. We are firm believers that affordability should never affect quality; and since the beginning we have strived to bring boutique interior design to residential and commercial developments.

Our designs cater for new developments, renovations, bars, restaurants, cafes and hotels, and we pride ourselves on creating incredible pieces that become the talking point for every room. Every member of our team loves interiors, which is why we promise to never waver on our commitment to excellence.

our offer

our offer

Eerospace do so much more than simple interior design. We provide the highest quality end-to-end solutions for modern interiors, from commission to completion. We excel in creating contemporary wardrobes, kitchens, public seating areas and bespoke furniture, and appreciate every detail, texture and stitch that goes into bringing a client's vision to life. And with 30 years knowledge of the construction and design

industries, we are able to bring each of our client's desires together with the developer's budget.

the zero difference

the eero difference

Every Eerospace interior gives developers complete access to the best in interior design. Working alongside our design partners in Italy we can cater for any budget without wavering on our commitment to excellence. We work with architects and contractors during the entire design process, helping avoid early design mistakes and making better renovation decisions. Our design team can oversee the staging of a space, ensuring each property

is marketed to its potential - savings costs on third party marketing. We measure our success on the value we create for clients and are committed to providing the best interiors for every project.

eeroliving

Eeroliving is Eerospace's contract furniture supply group. The Eeroliving team pride themselves on being able to offer European elegance at commercial prices for restaurants, hotels, cafes, bars and office spaces in Europe and the United Kingdom. For us, it's always been important that commercial spaces are treated with the same care any modern interior be treated with; and so we treat every commercial interior as if they

were an extension of our residential designs. We want our passion for design to be evident in every interior and the only way to do this is giving every space the same respect.

wardrobes & storage

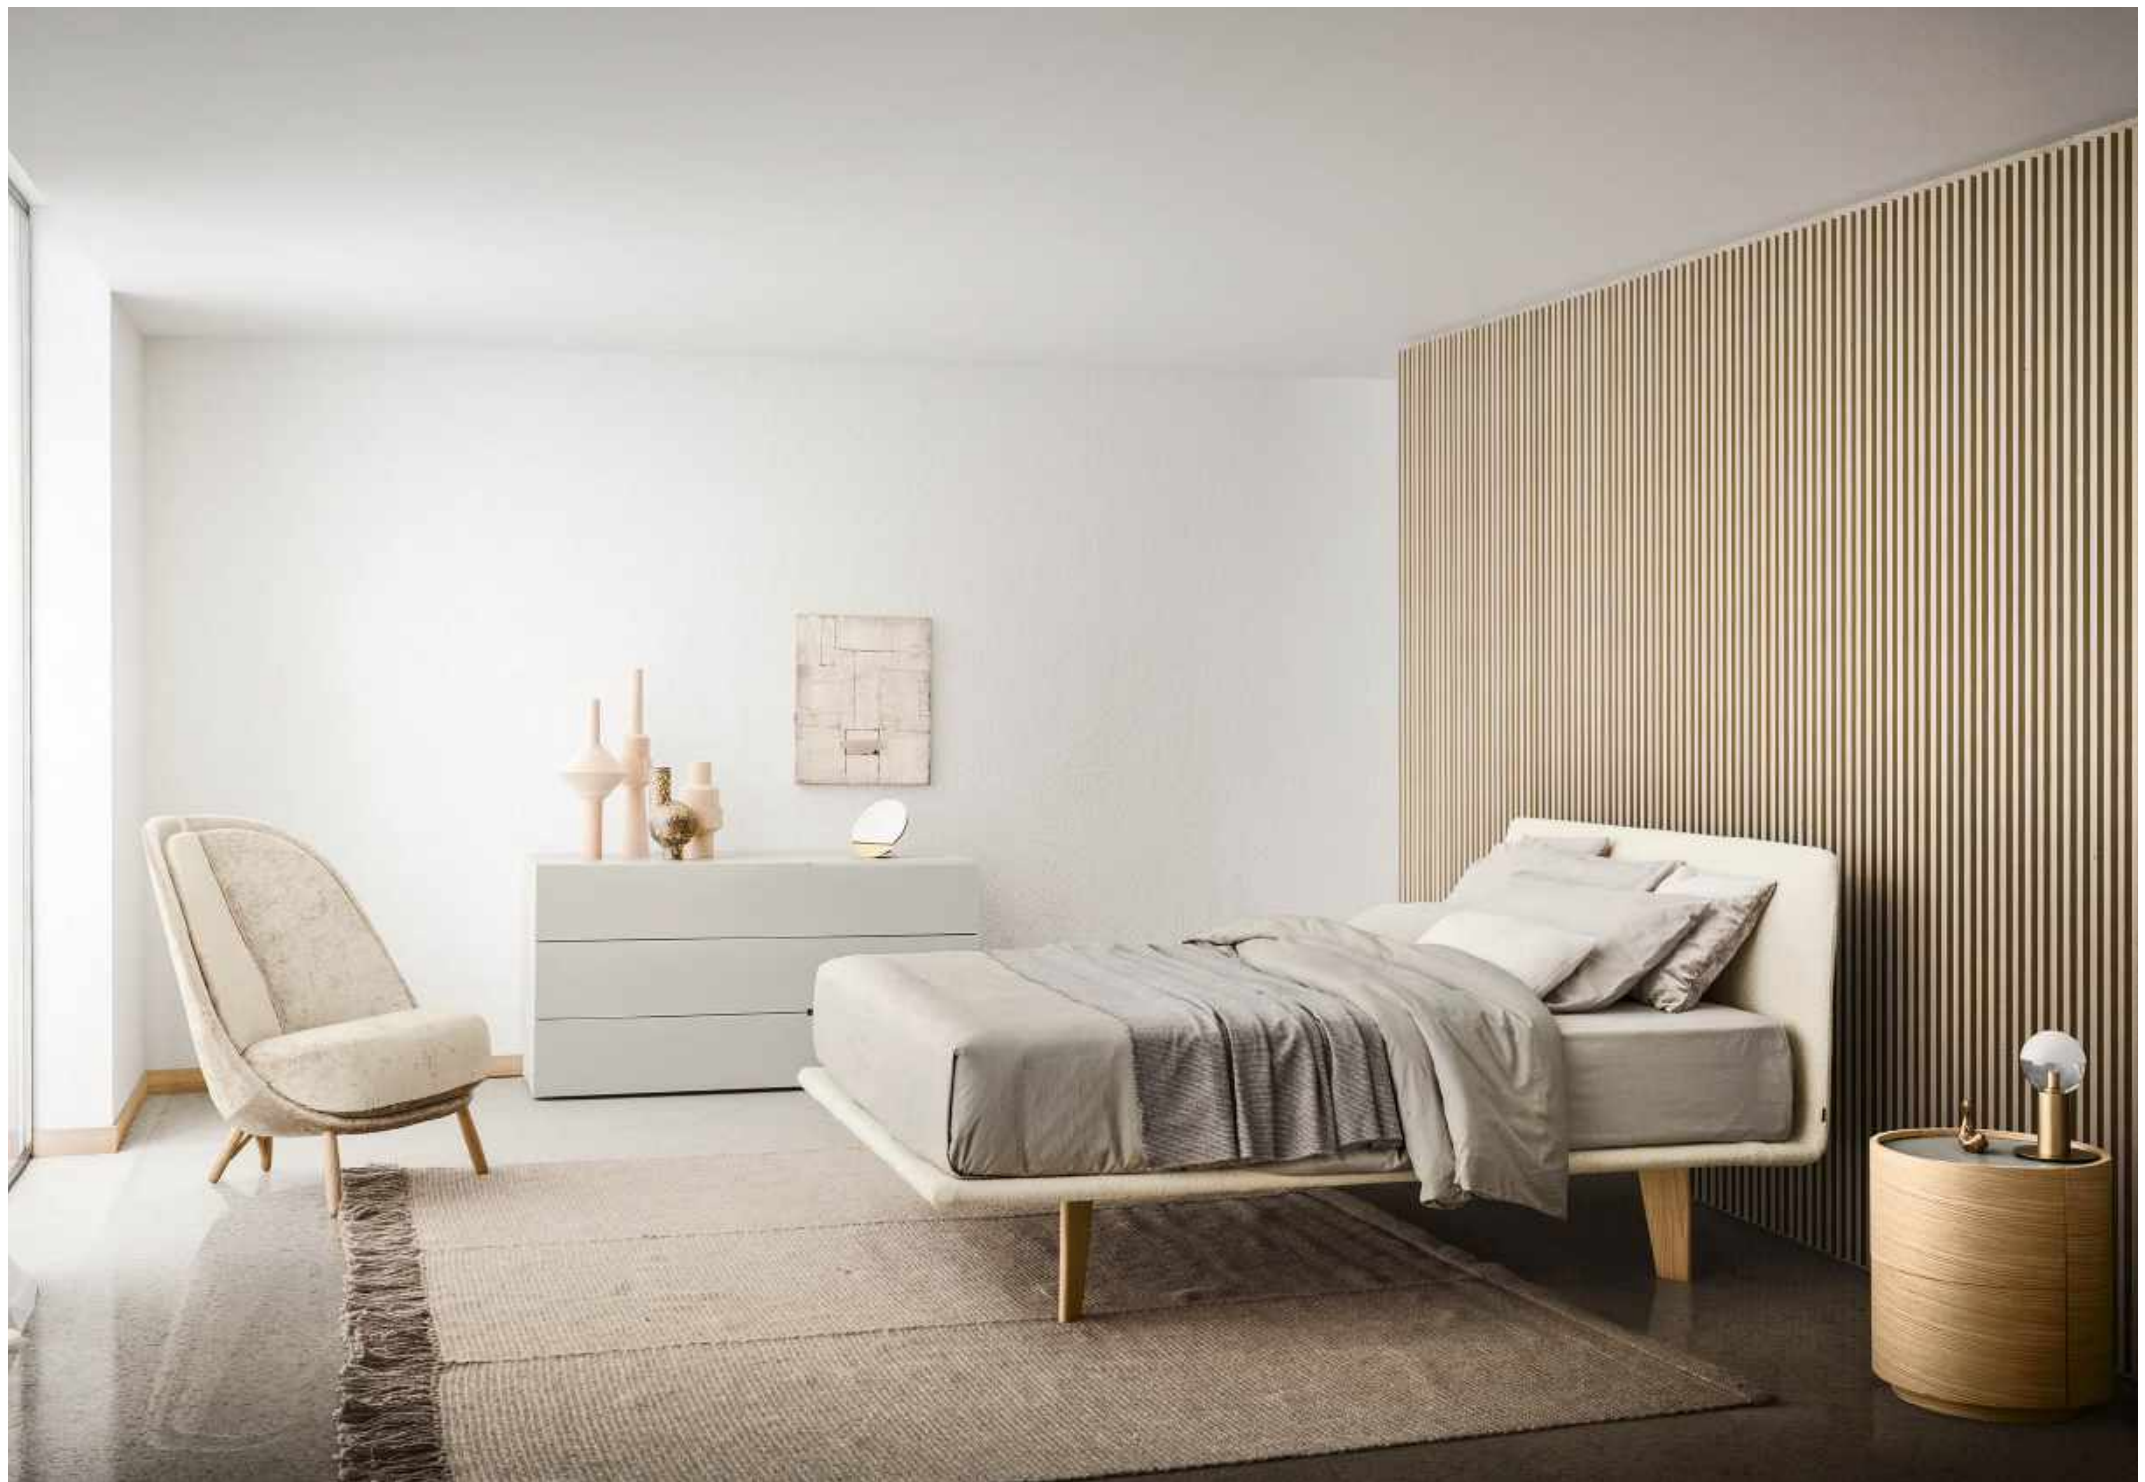

Our design team also specialise in bespoke wardrobes and storage spaces for contemporary interiors. Every design has simplicity at its heart, combining straight lines, hidden storage and display to create practical solutions that become more than just a storage location. Our designers can create any piece around your requirements, be it traditional or modern, ensuring the design process is truly 'client led'. To view examples of our incredible

wardrobe and storage solutions, please visit our website.
